

# RELEASE NOTES

Update Date: April 13, 2023

---

Dear Customers,

We are happy to let you know that we are live with the latest release of the **Customer Traceability Report**. You can see the changes in the same link where you usually access the [reports](#).

## **Changes in the Customer Traceability Report:**

- Processed Fruits are now available. The equivalence for this crop is “Soluble Solids”.
- Crop filter. Now you can filter based on three different levels: Crop Category, Crop and Subproduct.
- Some visuals have been updated. Some examples are the new retention ribbon chart, the pie chart removal, the addition of “% Shares” column and the conditional formatting as a green bar in the tables.

**New Tea Selling Marks report:** It shows the selling marks that were put in by farm certificate holders with a 2020 license. This provides a one-stop overview of all the marks associated with currently certified producers. The report doesn't include pre-merger data nor from China.

Best regards,

On behalf of the Insights Delivery Team
