

INTRODUCING INTEGRATED LANDSCAPE MANAGEMENT

Online Session: Part 2

Check-in

OBJECTIVES

1. Understand the **Benefits of ILM** compared to other land management & development approaches
2. Identify who the **Key Actors** are in landscapes & discuss the concept of **Landscape Partnerships (LPs)**
3. Explore how to implement ILM, with a focus on the **five elements** of the **ILM Framework**
4. **Foundational competencies**, cross-cutting abilities that allow an LP to function

AGENDA

- “Why” - benefits of ILM
- “Who” practices ILM

BREAK

- “How” to practice ILM:
5 elements of the ILM Framework
- Foundational competencies
- Breakout group exercise

WHY

WHY
IMPLEMENT
ILM?

DIFFERENT APPROACHES TO LAND MANAGEMENT & DEVELOPMENT

SECTORAL APPROACH

- Focus on **one sector** of economy (national)
- Stakeholder collaboration for issues in sector environment
- Public sector driven
- *Usually does not incorporate issues in the sector's wider enabler environment*

VALUE-CHAIN APPROACH

- Focus on value addition for **components of chain**
- Confined to one commodity
- Private sector driven
- *Little attention for the environmental and social impacts within the wider area of operation*

ILM APPROACH

- Takes a **geographical area** as a starting point
- Looks at entry points in an integral way, with spatial integration of sectors and chains
- Focus on public-private governance mechanisms within area

Q & A

WHO

MAIN ASSUMPTION

Landscape challenges cannot be solved by a single stakeholder acting alone

MSP RATIONALE

Shared vision and coordinated action are needed to achieve desired change

LANDSCAPE PARTNERSHIP

***“Long-term,
intersectoral and
multistakeholder
partnership among
different groups of
land managers,
organizations &
resource users
working together
for the future of the
landscape”***

LANDSCAPE PARTNERSHIP

- Diversity of stakeholders
- Diversity of interests
- Collaborating
- Negotiating
- Looking for synergies for a shared vision of a sustainable landscape

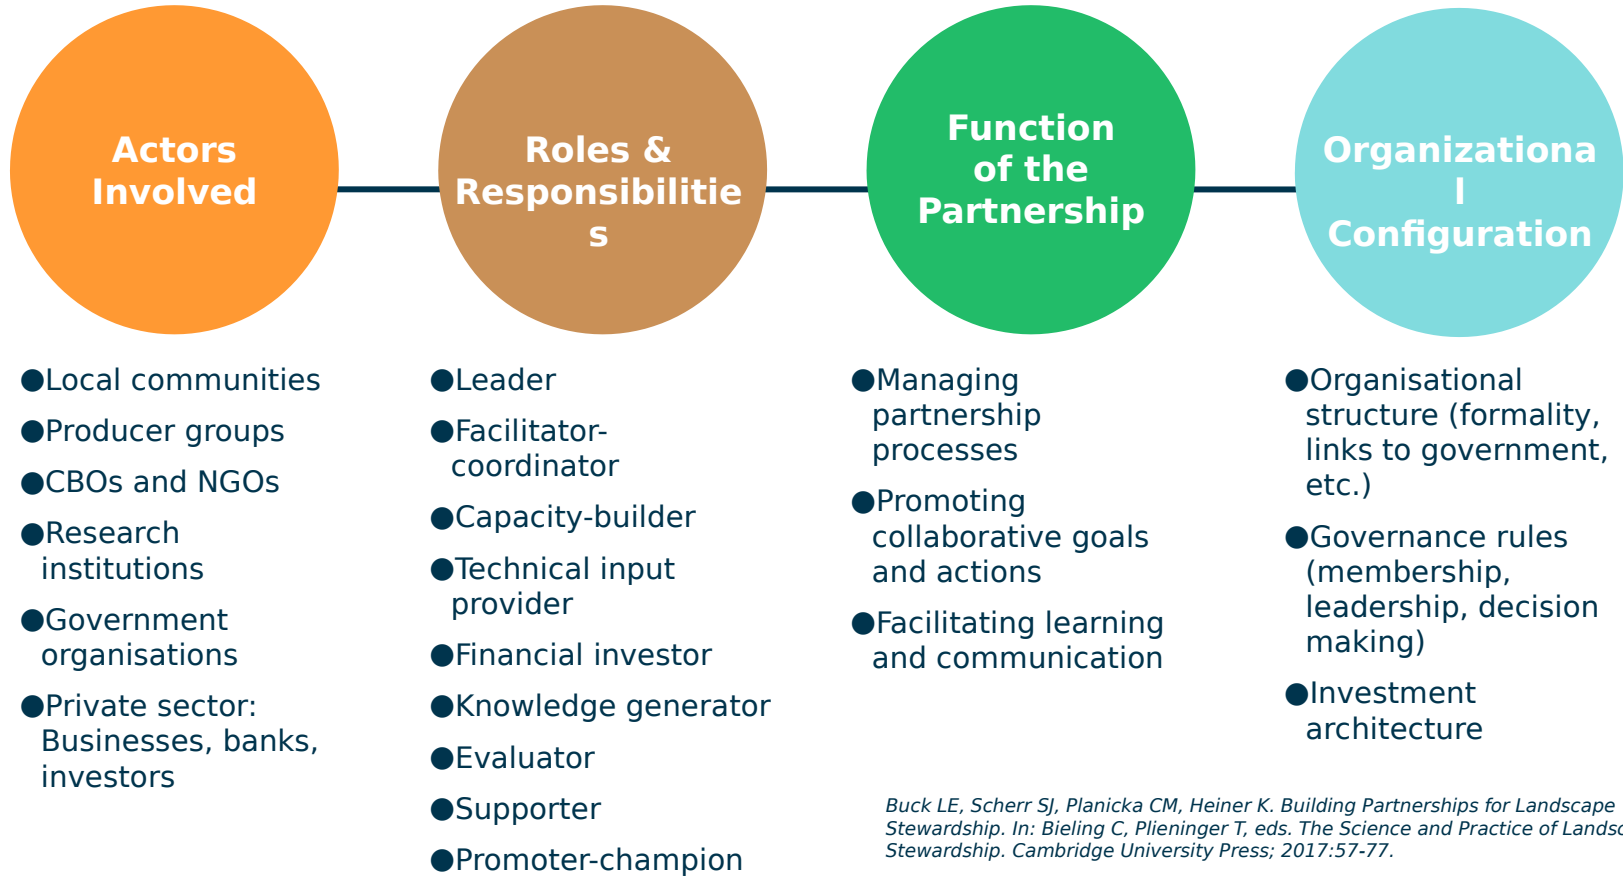

WHO IS SITTING
AT THIS TABLE?

Government, private sectors (agriculture, mining, industry, etc.), civil society, local communities and traditional groups, NGOs ... all at the same table.

DESIGN ELEMENTS FOR LANDSCAPE PARTNERSHIPS

Could anyone share a difficult experience you've had working in

MULTI-STAKEHOLDER PLATFORM

10 MIN BREAK

HOW

5 ELEMENTS OF ILM

1. Landscape Partnership
2. Shared Understanding
3. Vision & Planning
4. Taking Action
5. Learning & Impact

1. LANDSCAPE PARTNERSHIP

- Developing a strong, long-lasting **coalition of stakeholders** in the landscape from **across sectors** & communities
- LPs bring different stakeholders together to agree on and pursue a **common strategy** to achieve **resilient & sustainable** landscapes

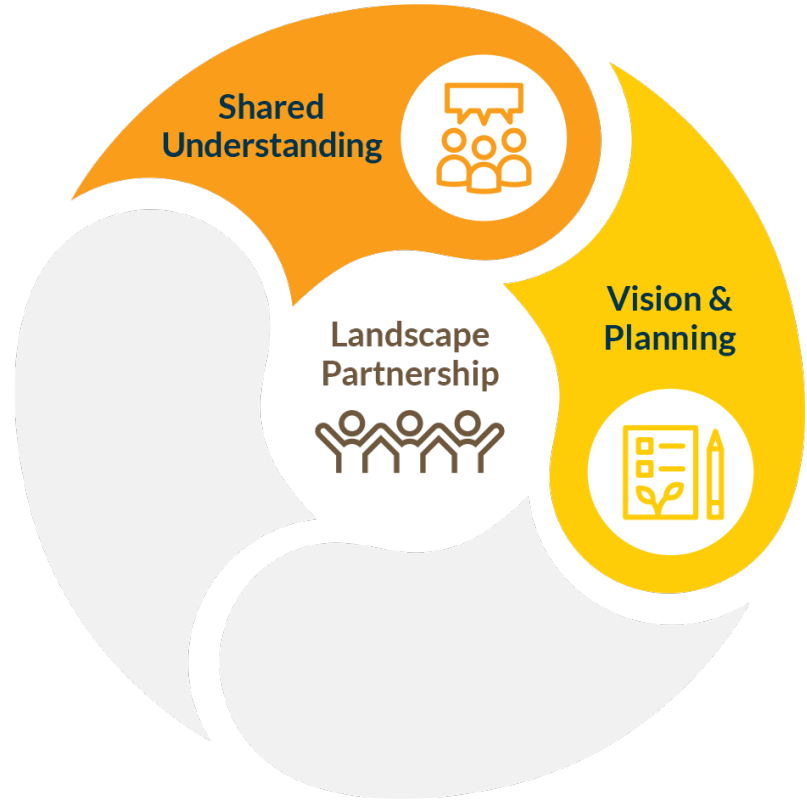

2. SHARED UNDERSTANDING

Building a **common understanding** of the state of the landscape, trends, future scenarios & one another's interests

3. VISION & PLANNING

Forging a long-term, inspiring **vision & strategy** & developing a spatially targeted action plan & landscape finance approach

4. TAKING ACTION

Coordinating action,
developing & financing an
integrated landscape
investment portfolio &
tracking & communicating
implementation

5. LEARNING & IMPACT

Measuring landscape impacts, capturing **lessons learned &** adjusting the landscape strategy & action plan

FOUNDATIONAL COMPETECY AREAS

- **Understanding of ILM**
- **Understanding of the landscape as a system and ecological flows**
- **Facilitation and training skills**
- **Youth engagement**
- **Shared Leadership**
- **Diversity, Equity and Inclusion**
- **Landscape Finance**
- **Advocacy**
- **Conflict management and negotiation**

Riverlandia Landscape

Problem: diminishing water quantity and quality

Source: <https://www.howitworksdaily.com/wp-content/uploads/2013/04/Rainforest.jpg>

Source: <https://sustainability.colostate.edu/humannature/ali-tasdighi/>

BREAKOUT GROUPS

You (all) work for an NGO that has long-term goals, interests and ambitions in the landscape. You recognize you need to address the serious issue of diminishing water quality and quantity in the landscape. You know you cannot solve this problem alone and need to engage other stakeholders. Reflect on your role as initiator and convener of an “alliance” to address this issue.

BREAKOUT GROUPS

Divide into breakout groups.

1. Choose an entry point: name one issue where you want to start solving the larger problem
2. Name 5 stakeholders you would start with and how you would get them on board

RECAP

TO RECAP ILM PARTS 1 & 2:

- *The landscape puzzle: An introduction to the landscape approach*
 , Wageningen Centre for Development Innovation
- *Building partnerships for landscape stewardship*

THANK
YOU!
